IN2SAFE

SAFETY SIGNAGE

We offer a full range of safety signage for all applications. With a wide range of standard designs and the ability to customise to suit specific needs nothing is out of reach. Our most popular materials are 2mm Rigid PVC, Self-Adhesive Vinyl Stickers or 4mm Aluminium Composite Material (ACM), but we can also offer 1.2mm Electro-galv steel for Magnetic receptive signs, 5mm Corflute for Promotional / Short Term signage and many other substrates if required. All our signage is manufactured using Premium European Vinyl's and Overlaminates to give a 5 year outdoor Durability, we can also offer 7 – 10 year options if required. With many different options of Over laminate you can tailor the finish & performance of your signage to each application, maximising the impact while ensuring that the performance is not compromised. Laminates include Clear Gloss, Clear Matte, Whiteboard Surface, Anti-Skid, Anti-Graffiti and a range of Translucent Colours used in conjunction with a high Grade reflective. All these options are backed by our comprehensive warranty and are usually dispatched with 24 hours of confirmation of order or proofs.

IN2SAFE

TRAFFIC SIGNAGE

We manufacture all Traffic signs to NZTA specifications, using approved Reflective materials and Designs. We can also offer a full range of Mounting Brackets, Poles and accessories for Permanent signs and can source Temporary Sign stands, Cones and other Traffic control products as required. Along with the standard range of Traffic Signage we also specialise in producing custom signage for the Forestry & Heavy Construction Industries for off road use. These custom signs are designed with a similar format to regular Traffic signs to ensure that both the impact is maximised and they can be easily fitted to standard Traffic sign stands. Our strength is our flexibility & Production Speed with this range, we can offer Logo printing on these signs with no set up cost and no minimum quantity, and can produce your order and dispatch with 24-48 hours in most situations.

IN2SAFE

LOCKOUT SYSTEMS

We stock a comprehensive range of Safety Lockout Products to allow for small through to complex lockout requirements. From small contractors packs to highly customised systems for High Risk environments we have the range to cater for all your requirements. We stock a wide range of padlocks, with multiple colour options and both Keyed Alike and Keyed Different configuration. We can also customise packages utilising keyed alike groups and master keys to enable complex multi-level lockout abilities. With our in house printing capabilities we can also provide Padlocks with individual Names & Photo ID stickers. Aside from our stocked range of Padlocks, Electrical Lockouts, Valve Lockouts, Key Cabinets, Lockout Stations, Tags and Universal type lockouts, we can also special order many other more specialised products on demand.

DESIGN YOUR OWN CUSTOM CAUTION SIGNS

VC7000

Available in the following Sizes;

M - 150 x 200mm, A - 225 x 300mm, B - 300 x 400mm,
C - 450 x 600mm, D - 600 x 800mm, Y - 900 x 1200mm.

Available in the following Materials;

A - ACM (4mm Aluminium Composite Material), P - PVC
(2mm Rigid PVC Board), S - SAV (Self Adhesive Vinyl Sticker).

VC7500

Available in the following Sizes;

M - 200 x 150mm, A - 300 x 225mm, B - 400 x 300mm,
C - 600 x 450mm, D - 800 x 600mm, Y - 1200 x 900mm.

Available in the following Materials;

A - ACM (4mm Aluminium Composite Material), P - PVC
(2mm Rigid PVC Board), S - SAV (Self Adhesive Vinyl Sticker).

VC7600

Available in the following Sizes;

M - 200 x 150mm, A - 300 x 225mm, B - 400 x 300mm,
C - 600 x 450mm, D - 800 x 600mm, Y - 1200 x 900mm.

Available in the following Materials;

A - ACM (4mm Aluminium Composite Material), P - PVC
(2mm Rigid PVC Board), S - SAV (Self Adhesive Vinyl Sticker).

VC7700

Available in the following Sizes;

O - 75 x 75mm, G - 100 x 100mm, L - 150 x 150mm,
R - 200 x 200mm, Z - 300 x 300mm, W - 400 x 400mm

Available in the following Materials;

S - SAV (Self Adhesive Vinyl Sticker).

VC7800

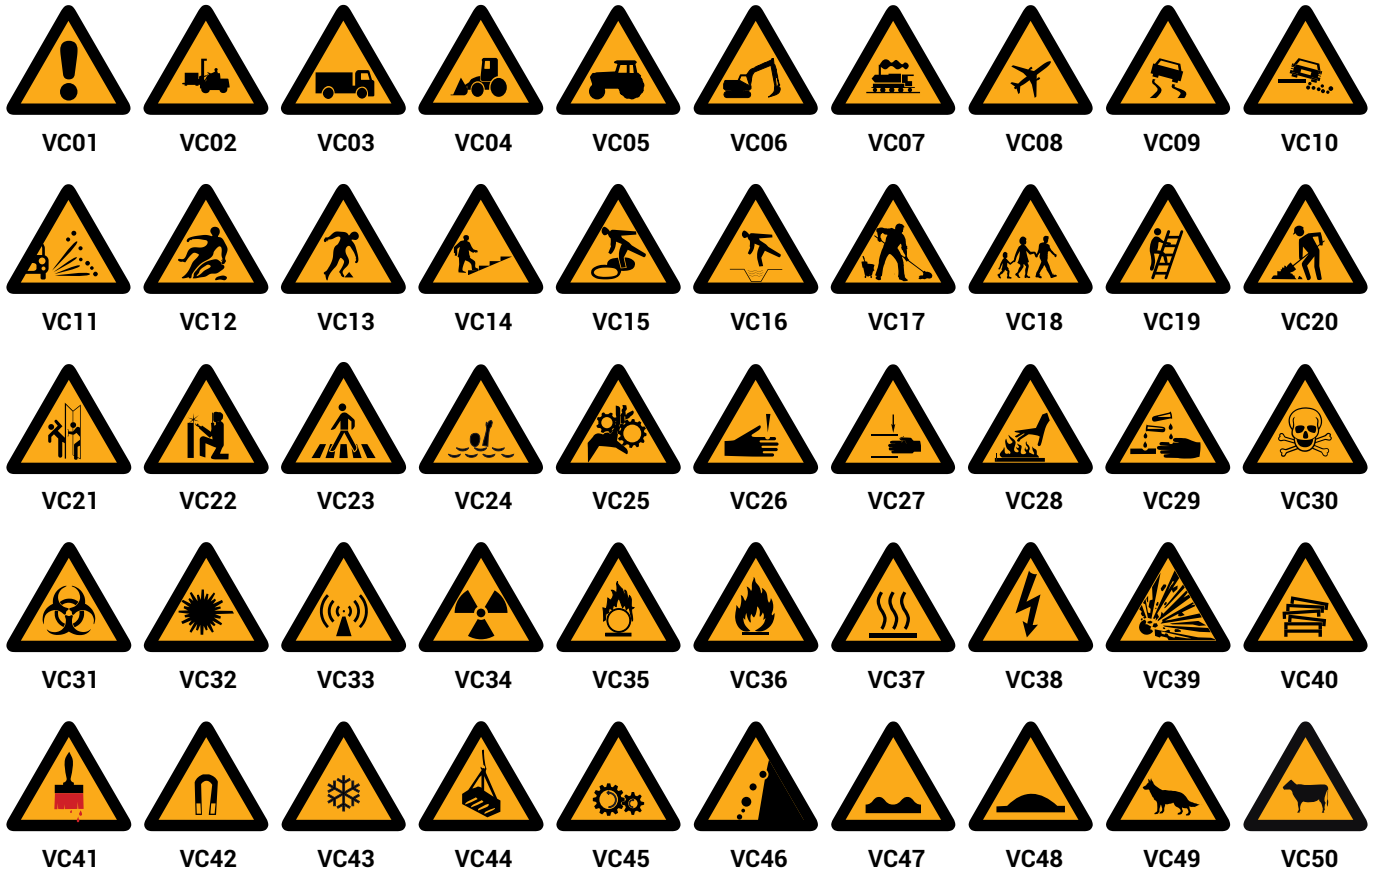

Available in the following Sizes;

O - 75 x 75mm, G - 100 x 100mm, L - 150 x 150mm,
R - 200 x 200mm, Z - 300 x 300mm, W - 400 x 400mm

Available in the following Materials;

S - SAV (Self Adhesive Vinyl Sticker).

STANDARD ICONS AVAILABLE

TO ORDER: When placing your order please reference the product code off the opposing page followed by the letter to designate Size and then the letter to designate Material. The Size and Material options are noted next to each template on the opposite page. Then note the Icon you require using the codes above and finally the Text that you require on the sign.

For example the custom 300x400mm PVC sign to the right would be specified in the following manner;

VC7000BP - VC08 - "Aircraft Passing Overhead"

Then add a second letter as follows to specify the material. A - ACM (4mm Aluminium Composite Material), P - PVC (2mm Rigid PVC Board), S - SAV (Self Adhesive Vinyl Sticker). For Example a 400 x 300mm PVC Sign code would look like VC7516BP

VFG7010 - Anti Skid Floor Graphic - 600x100mm

VFG7011 - Anti Skid Floor Graphic - 600x100mm

Anti-skid Floor Graphics are for use when there is no space for conventional signage. They are supplied as a self adhesive sticker and have a very strong adhesive which will adhere to all regular floor surfaces including carpet. The surface is a non-slip and is suitable for high traffic areas.

DESIGN YOUR OWN CUSTOM DANGER SIGNS

Face Mounted Emergency Exit Signs to meet **NZBC F8**

Since April 2012 the Building Code Acceptable Solution for emergency exit signage (F8/AS1) has allowed photoluminescent ("PL") exit signs to be used wherever "illuminated exit signs" are required.

There are strict performance requirements specified in F8/AS1 that make sure the PL signs will meet all the requirements of the NZ building code. To the best of our knowledge, Ecoglo signs are the only PL signs available in New Zealand that are bright enough to meet F8/AS1.

Ecoglo's Emergency Exit Signs are manufactured and tested to comply with F8/AS1. They are also designed to be used in engineered solutions to meet building codes in Australia, New Zealand and any performance based jurisdiction around the world.

Ecoglo's high visibility and durability ensure that the signs can be installed in any environment, indoors or outdoors. As long as there is sufficient natural or artificial light to charge the signs then a system can be engineered to meet building code performance specifications.

THE REVOLUTIONARY

BANANA CONE!

The glossy yellow Banana Cone™ is already revolutionising the way warning messages are displayed overseas and is now available in New Zealand.

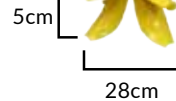

With the warning message inherent in the shape of the cone, these are a must for all situations where easy and quick recognition of warning signs is essential.

STAND OUT FROM THE BUNCH!

Features & Benefits

-  Printed on all four sides rather than two sides like traditional free standing warning signs
-  The banana peel being naturally associated with something slippery means that the warning cone also has a strong message inherent in the shape of the cone
-  Easy stacking and durable plastic makes for ease of storage and long life
-  Wide sturdy base and weight of 910 grams ensures cone will not blow over if used outdoors
-  Patented, trademarked design ensures value for resellers

WET FLOOR
Code: VBC701

SLIPPERY FLOOR
Code: VBC702

CLEANING IN PROGRESS
Code: VBC703

*Also available as blank cones (code #VBC700) and with custom messages on request.

FOOTPATH SIGNS

ANTI-SKID FLOOR GRAPHICS

Footpath signs are comprised of a Sturdy Plastic Base which can be water filled and a 4mm ACM sign blade, 600mm wide x 800mm High. They can be printed single or Double sided and can be reflective if required.

To order email your design to sales@in2safesigns.co.nz

Code: VF7901B

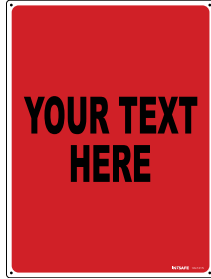

Anti-skid Floor Graphics are for use when there is no space for conventional signage. They are supplied as a self adhesive sticker and have a very strong adhesive which will adhere to all regular floor surfaces including carpet. The surface is a non-slip and is suitable for high traffic areas. We can print any of the signage designs in this catalogue as Floor Graphics and also any custom Designs & Advertising as required.

DESIGN YOUR OWN CUSTOM SIGNS

VG7000

VG7415

Available in the following Sizes;
M - 150 x 200mm, A - 225 x 300mm, B - 300 x 400mm,
C - 450 x 600mm, D - 600 x 800mm, Y - 900 x 1200mm. **Available in the following Materials;**
A - ACM (4mm Aluminium Composite Material), P - PVC (2mm Rigid PVC Board), S - SAV (Self Adhesive Vinyl Sticker).

Available in the following Materials;

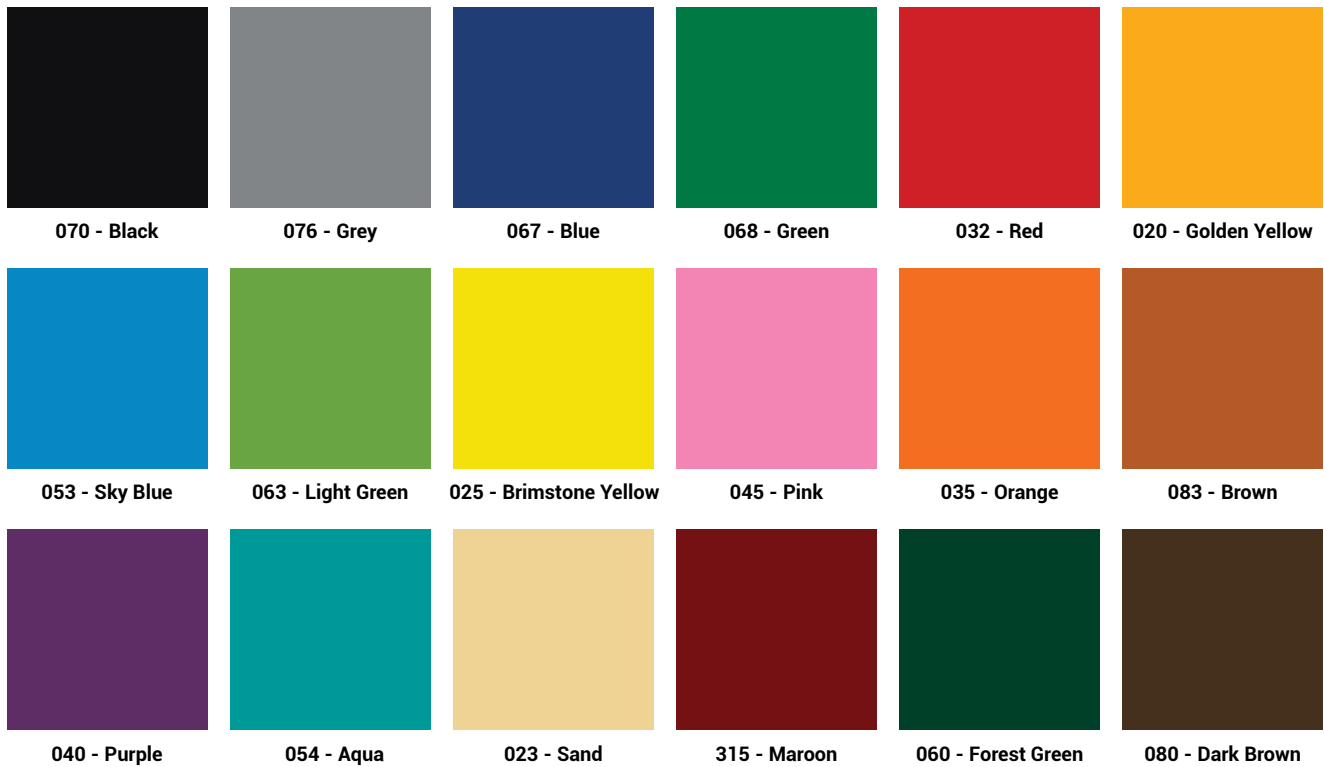

A - ACM (4mm Aluminium Composite Material), P - PVC (2mm Rigid PVC Board), S - SAV (Self Adhesive Vinyl Sticker).

VC7600

Available in the following Sizes;
H - 200 x 70mm, P - 400 x 150mm
Available in the following Materials;
A - ACM (4mm Aluminium Composite Material), P - PVC (2mm Rigid PVC Board), S - SAV (Self Adhesive Vinyl Sticker).

Colour Picker for Backgrounds & Borders

TO ORDER: When placing your order please reference the product code off the opposing page followed by the letter to designate Size and then the letter to designate Material. The Size and Material options are noted next to the templates on the opposite page. Then note the Text that you require on the sign and the Text, Border & Background Colour using the Colour Picker above.

For example the custom 300x400mm PVC sign to the right would be specified as follows;
VG7000BP - "This is an Example Custom Sign",
Text 032, Border 070, Background 025.

Please Note: Our default Font is Arial Black and Capitals so all text will be printed in this Font, converted to Uppercase and centered Horizontally & Vertically in the available space unless specifically requested otherwise. For alternative Fonts & Layouts please contact us via the contact details at the botton of this page.

TO ORDER CUSTOM EMERGENCY INFORMATION PANELS :

When placing your order please reference the product code VH7000, followed by the letter to designate Size and then the letter to designate Material as explained in the Footer below. Then specify the Hazchem Code, UN Number and Chemical Name you require.

For example a custom 400x300mm PVC sign for Hydrochloric Acid would be specified in the following manner; VH7000BP, "2R, UN 1789, HYDROCHLORIC ACID"

TO ORDER: When placing your order please reference the product code followed by one of the following letters to specify the size of the sign. A - 225 x 300mm, B - 300 x 400mm, C - 450 x 600mm, D - 600 x 800mm

Then add a second letter as follows to specify the material. A - ACM (4mm Aluminium Composite Material), P - PVC (2mm Rigid PVC Board), S - SAV (Self Adhesive Vinyl Sticker). For Example a 300 x 400mm PVC Sign code would look like VH7015BP

Emergency Response Information

UN Number	Proper shipping name	Class	Packing Group
UN 3082	ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (Diesel)	9	III

In an emergency:

- Show to your distance from the incident, at least 15 metres if diesel is spilled. Call emergency response information and call phone with you.
- Call 111 and ask for Police or Fire Service.
- Tell them where the incident has happened and any details of injuries.
- Tell them that dangerous goods are involved and advise the UN number, proper shipping name and class of the dangerous goods, as written at the top of this page.
- When the police and keep them clear of the incident.
- Move yourself and to higher ground.
- Follow the instructions of the Police or Fire Service.

 Note: All these kits comprise two signs, 750x750mm Main & 950x500mm Supplementary signs. Drilled to suit Traffic Sign Stands.

KONGCRETE®
POST INSTALLATION KIT
EASIER//QUICKER//LIGHTER THAN CONCRETE

IT'S AS EASY AS...

1 MIX 2 POUR 3 SET

KONGCRETE® is a revolutionary new way to install Sign & Fence posts. It is an alternative to concrete that is lightweight, does not require water, sets in 3 minutes and is extremely easy to use!

Each kit contains two components, that are mixed together for approximately 30 seconds before pouring the mixed material into the hole.

KONGCRETE® can be used to install many different types of posts such as fence and sign posts, road and construction signs, as well as mailboxes, sports posts and poles, flagpoles and garden light posts.

FAQ's

What is Kongcrete?

Kongcrete is a revolutionary new way to install fence & sign posts. It is a high strength alternative to concrete that is lightweight, does not require water, sets in 3 minutes and is extremely easy to use.

Kongcrete is a hydrophobic two-part composite backfill that expands to fill the peripheral void between a fence or sign post and the hole. Kongcrete expands immediately after mixing and reaches 50% of full strength in approximately 3 minutes. In approximately 15-30 minutes Kongcrete will already be quite hard. Fences or gates can be installed after the product completely sets in approximately 2 hours.

Will Kongcrete absorb water?

Kongcrete is waterproof when cured so will not absorb water. Kongcrete will also stop the post from rotting or corroding by providing a barrier between the wood and the water/soil. Due to its fast setting nature, Kongcrete is rain proof in a few minutes.

Is Kongcrete environmentally safe?

Once cured, Kongcrete becomes an inert solid and will not harm soil or water.

Can another Kongcrete kit be used on the top of the first one if required?

Yes, once the first kit has fully expanded another kit can be used on top.

What is the correct temperature for using Kongcrete?

Kongcrete is best used at 18 C - 25 C and the kits need to be stored at this temperature range for at least two hours before using. At lower temperatures, the kits will take longer to set and will produce less volume. At higher temperatures, the kits will set much faster, lowering the working time and will produce a higher volume, weaker composite.

What hole diameter is required when setting 100 mm x 100 mm post using Kongcrete?

As with any size post being set with Kongcrete the hole only needs to be slightly larger than the post itself. As Kongcrete is a pourable liquid when mixed it is easy to pour into a small cavity unlike concrete which requires a larger hole meaning more effort and material.

What type of posts can Kongcrete be used with?

Kongcrete can be used with a range of post types including Wood, Metal, Aluminium, Concrete, Vinyl and PVC and adheres to them better than concrete.

What happens if Kongcrete expands over the top of the hole?

Once cured excess Kongcrete can be removed by cutting with a handsaw or shovel.

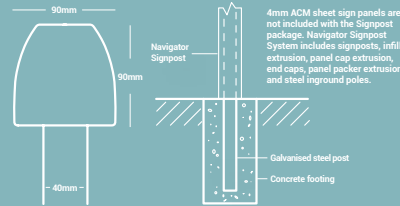

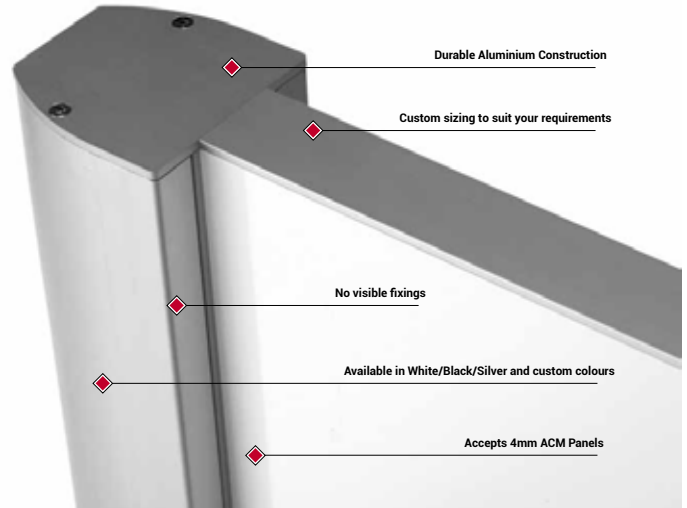

NAVIGATOR®
SIGNPOST SYSTEM

Navigator Signpost System combines sharp, clean design lines with practical simplicity, providing a system that enables signmakers to create freestanding signs in a wide range of different styles.

Navigator Signpost System is designed to be used with 4mm Aluminium Composite Material (ACM) panels. Available in powdercoated white, satin black or anodised satin silver - corporate match colours available on request.

NAVIGATOR SIGNPOST SYSTEM 05

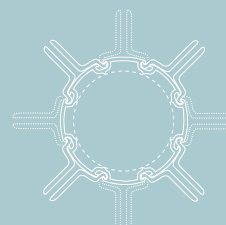

The system is modular, easy to alter and quick to assemble...

NAVIGATOR DIRECTIONAL POST SYSTEM 07

NAVIGATOR®
DIRECTIONAL POST SYSTEM

NAVIGATOR DIRECTIONAL POST SYSTEM is the easiest, neatest way of creating multidirectional signage. Designed to be very secure, yet easily changeable, the Directional Post System takes 4mm panels and is durable enough for the most demanding outdoor situations.

The easiest, neatest way of creating multidirectional signage!

NAVIGATOR WALLSIGN SYSTEM gives ACM sign panels a new dimension. Eliminate surface fixings and the unsightly cut edges of aluminium composite material panels with the Navigator Wallsign System.

The system provides a high level of finish for both interior and exterior wall signs and can be cut to suit almost any size panels – from small directional signs to large murals.

Available in 3 standard finishes – powdercoated white, or satin black, or anodised satin silver.

NAVIGATOR WALLSIGN SYSTEM 09

- 1 Affix rail extrusion to wall
- 2 Hang Wallsign panel
- 3 Screw in retention screws

Give ACM sign panels a new dimension!

NAVIGATOR®
DIRECTORY SYSTEM

Navigator 10 Directory System incorporates aluminium SignSlats and PaperChange panels or a combination of both in a wide range of size options, providing a versatile, modular directory system.

The innovative MCS – Multi Change System enables any SignSlat or PaperChange panel to be removed and replaced independently of other slats and panels. SignSlats and PaperChange panels are tamper proof yet easily changed using the changeout tools provided. Smart, clean design and innovative features make this system the ideal choice for your signage programme. A wide range of slat and panel options are possible – refer overleaf for more detail.

Completely secure with easy changeout.

NAVIGATOR DIRECTORY SYSTEM 11

Innovative PaperChange System allows easy changeout of printed material yet is tamper proof. Available in DLE, A4 Portrait, A4 Landscape, A3 Portrait and A3 Landscape.

MCS MULTI CHANGE SYSTEM®
Allows any SignSlat or PaperChange panel to be removed and replaced independently of other slats and panels using the changeout tools.

Aluminium SignSlats available in 4 standard heights – 30mm, 60mm, 90mm and 120mm.

SlidarSlat available in 30mm height. Ideal for indicating when meeting rooms are free or in use.

1. Release panel using changeout tools
2. Remove panel
3. Replace graphic
4. Replace panel

Flouro Flag
Code: PVF9067
- to fit over wooden Dowell
Size: 400 x 300mm

Fluorescent Yellow Flags (at least 400x300mm must be attached to indicate the Over Dimension portion on all Category 1 Vehicles or Loads. These are suitable for Day use only. If travelling at night they must be replaced with Retro-reflective Hazard Panels as below.

LH

Reflective Hazard Panels - Day/Night Use

Single Sided Left Hand Panel Code: VT7900SL
Single Sided Right Hand Panel Code: VT7900SR
Double Sided Panel Code: VT7900D

Size: 400 x 300mm
Material: ACM (4mm Aluminium Composite Material)

RH

Narrow Reflective Hazard Panels - Day/Night Use

Single Sided Left Hand Panel Code: VT7899SL
Single Sided Right Hand Panel Code: VT7899SR
Double Sided Panel Code: VT7899D

Size: 200 x 400mm
Material: ACM (4mm Aluminium Composite Material)

Retro-reflective Hazard Warning Panels with the dimensions as shown can be used on Category 1 & 2 Vehicles or Loads. These are suitable for Day or Night Use. Note: You must not display Hazard Warning Panels unless required to do so by the Vehicle Dimensions and Mass Rule.

Oversize Sign - Code: VT7901AA

Size: 1100 x 300mm
Material: ACM (4mm Aluminium Composite Material)
Suits: Day/Night Use

Oversize Sign - Code: VT7901AV

Size: 1100 x 300mm
Material: Flexible PVC (Roll-up)
Suits: Day only Use

Over Sign - Code: VT7902AA

Size: 550 x 300mm
Material: ACM (4mm Aluminium Composite Material)
Suits: Day/Night Use

Size Sign - Code: VT7903AA

Size: 550 x 300mm
Material: ACM (4mm Aluminium Composite Material)
Suits: Day/Night Use

Oversize Signs are required by the Vehicle Dimensions & Mass Rule on Vehicles or Loads over 3.1M Wide. They must only be displayed if required by the above Rule. These signs are suitable for both Category 1 & 2 Vehicles or Loads.

WARNING
Don't give yourself OOS!!
(Occupational Overuse Syndrome)
Remember these simple rules to prevent OOS...
- Micro-pause: Let go of your controls for about 15 seconds, every 5 minutes or so. Breathe up & shake your hands & arms. At the same time stare at something a long distance away.
- Take short breaks, of about 2 minutes every half hour: stretch arms & move about.
- Get out of the cab every hour, even if it's only for a minute or so!
- Don't over-reach for any controls: adjust your seat so it is as close to the controls as possible.
- Job rotation: Give somebody else a go on your machine, so you can get out of the cab more often.
- Ensure your machine is well maintained, to minimise vibration, don't use vibrating controls.

IN2SAFE

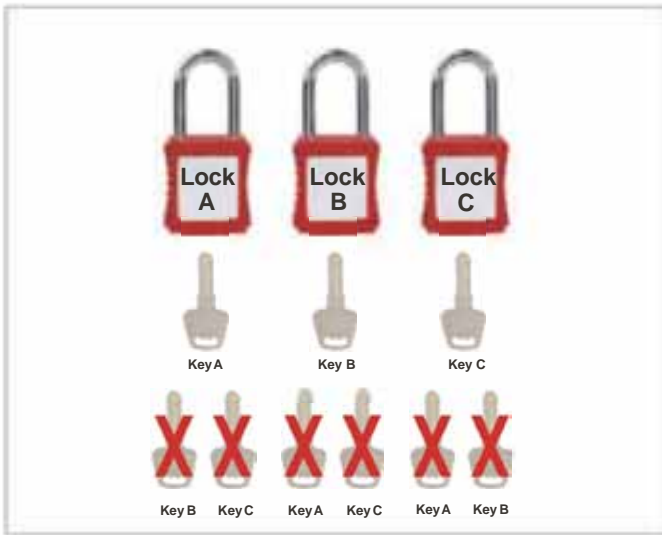

LOCKOUT SYSTEMS

IN2SAFE Lockout Padlock - Key Management System

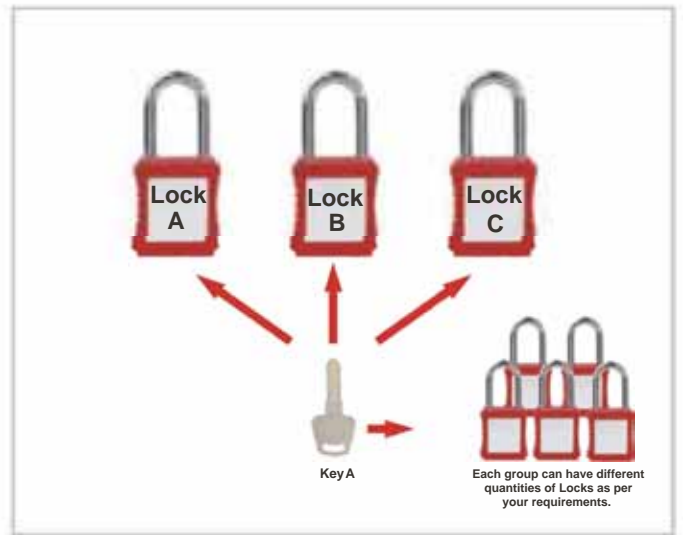

The IN2SAFE Lockout Padlocks come with both Keyed Different and Keyed Alike options, along with a Master key system. This allows a high level of customisation for complex lockout systems with Multi level access and a wide range of different Groups. See below for Diagrams of each Key option.

Keyed Different

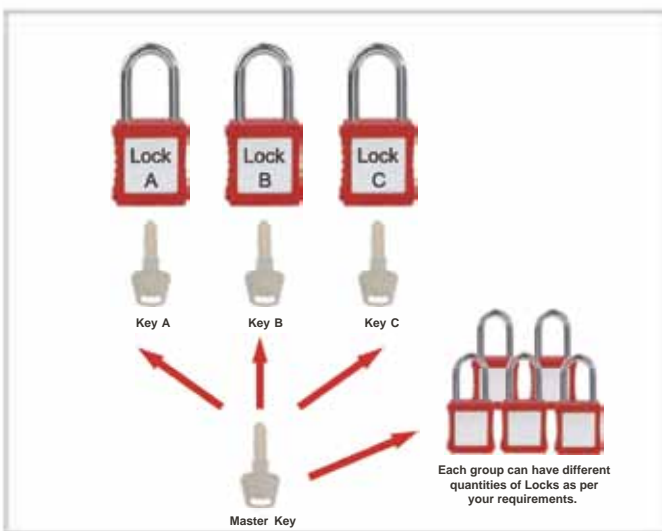

Each Lock has only One Key. The Key does not open any other Locks. Ideal for Maximum Safety in High Risk applications. Only the Lock owner can remove the Lock with no risk of accidental removals.

Keyed Alike

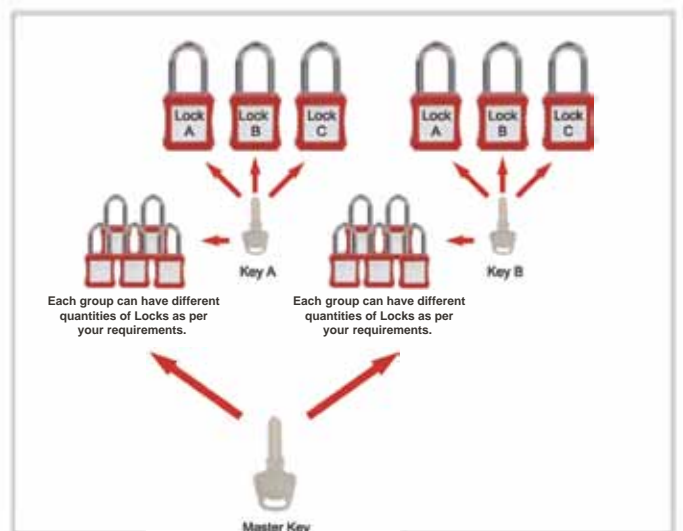

Each Lock within a designated group takes the same Key. The Key will open all Locks within the Group. Multiple Groups can be set up with different keys. Ideal for situations where individuals need multiple padlocks. Requires careful Management to ensure no crossover of Keyed alike Padlocks between staff.

Keyed Different with Master Key

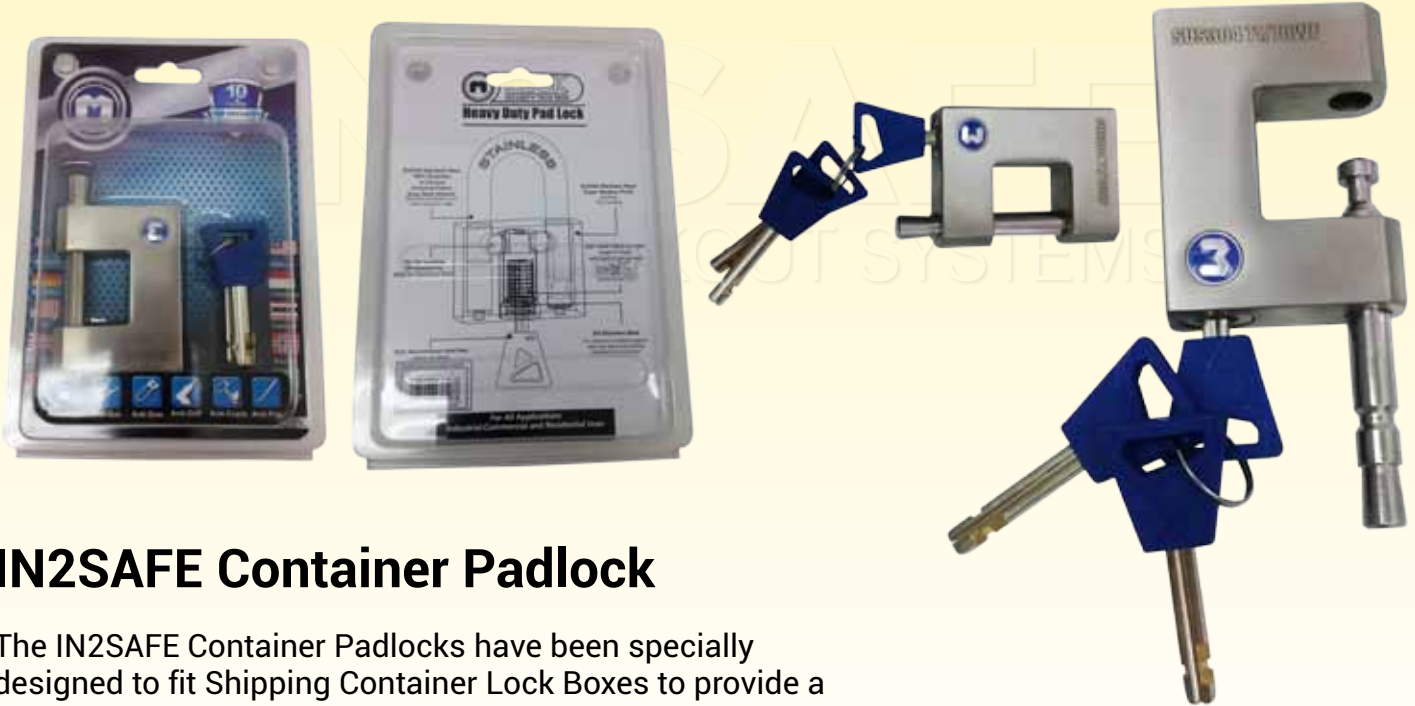

Exactly the same principle as the standard Keyed Different Locks, except there is a Master Key which will open all Locks in the Group. Ideal for Plant Shutdown situations. A designated Supervisor has the ability to remove any locks left after the job is finished. Must be managed very carefully to minimise the risk associated with this type of system.

Keyed Alike with Master Key

Exactly the same principle as the standard Keyed Alike Locks, except there is a Master Key which will open all Groups. Also ideal for Plant Shutdown situations. A designated Supervisor has the ability to remove any locks left after the job is finished. Must be managed very carefully to minimise the risk associated with this type of system.

IN2SAFE Container Padlock

The IN2SAFE Container Padlocks have been specially designed to fit Shipping Container Lock Boxes to provide a secure and easy to use locking system. Locks are available in both Keyed Different & Keyed Alike sets.

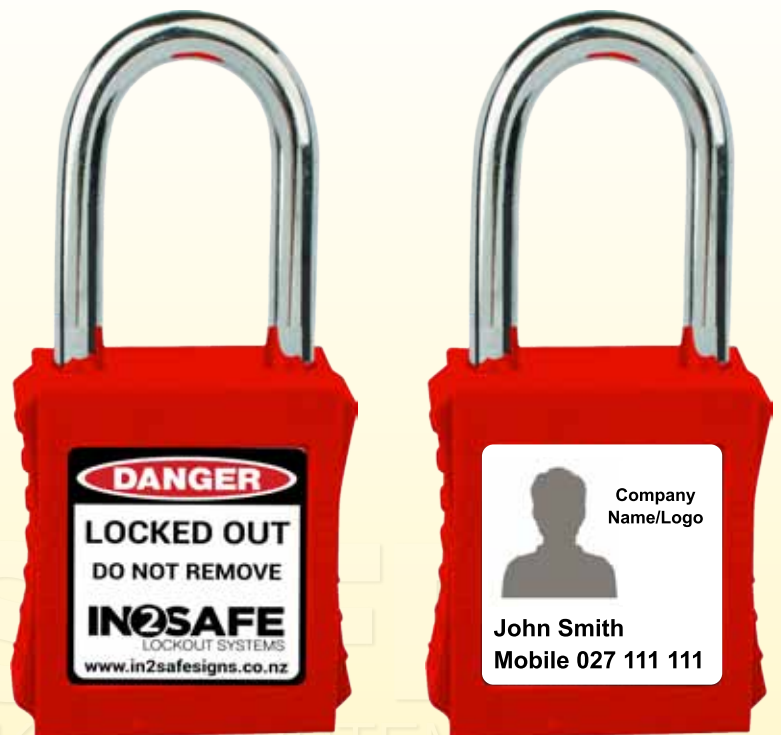

VLP1000-KA (Keyed Alike) VLP1000-KD (Keyed Different)

IN2SAFE Lockout Padlock - Unique ID Systems

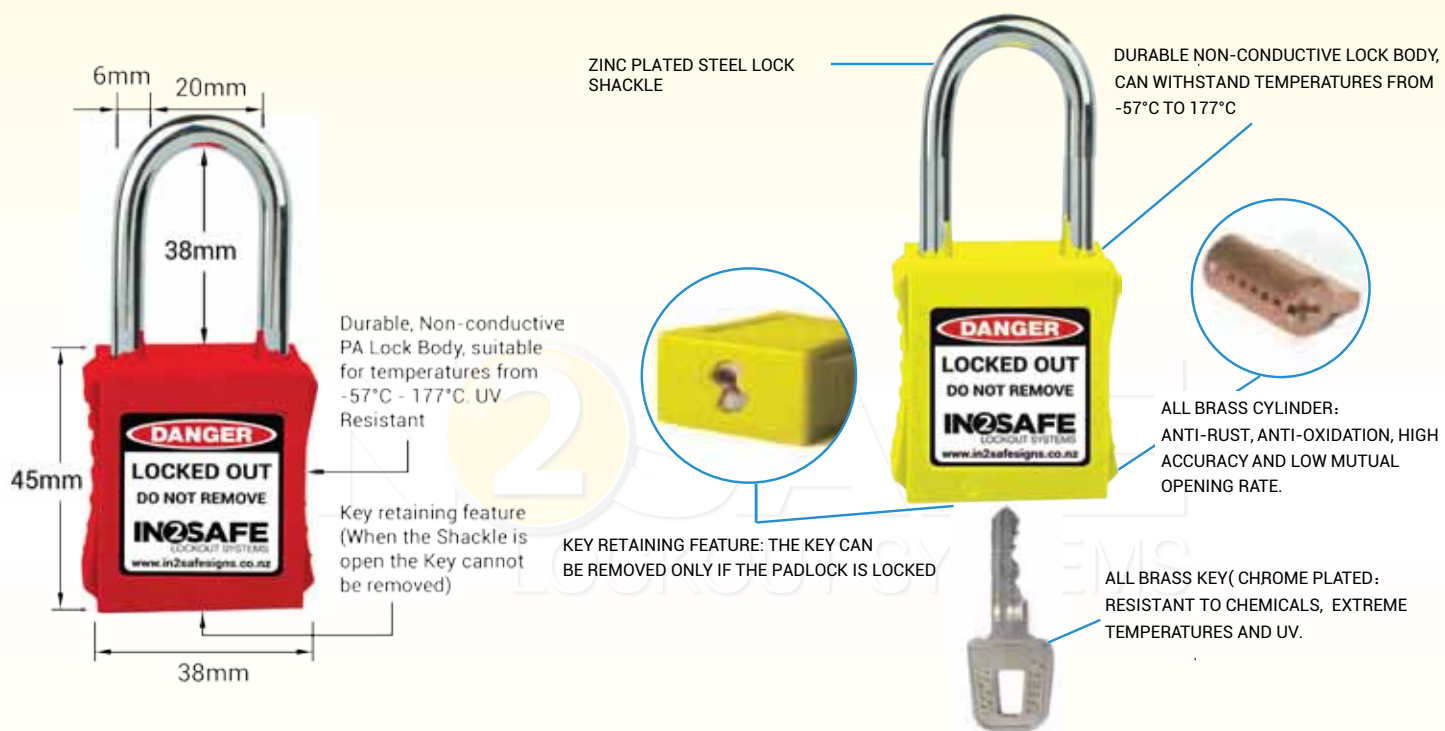

The IN2SAFE Lockout Padlocks can be specified with Custom Printed Labels. These labels can support a number of Variable Printed fields, including a Photo ID, Name, Mobile Number and any other relevant information to allow easy Identification. This can significantly reduce the time taken to resolve the issue of Padlocks left in place after the job is completed. Especially helpful in Planned shutdown situations where it is important to re-energise and re-start plant as quickly as possible.

Butterfly Valve Lock

Code	Size
VLV701-1	9.5-32mm (0.375-1.25")
VLV701-2	38-63.5mm (1.5-2.5")
VLV701-3	50-203mm (2-8")

The butterfly valve lock is made up from three parts as shown below.

Different ways to use a Butterfly Valve Lock

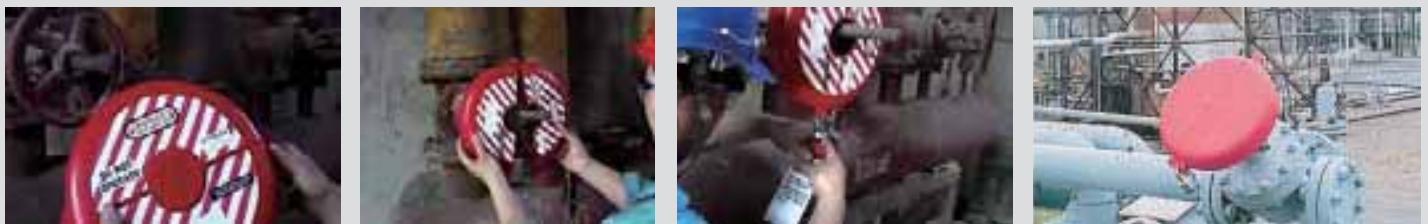

Gate Valve Lockout

Code	Size
VLV702-1	25-63.5mm (1-2.5")
VLV702-2	63.5-127mm (2.5-5")
VLV702-3	127-165mm (5-6.5")
VLV702-4	165-254mm (6.5-10")
VLV703-A	25-165mm (1-6.5") (universal size)

The gate valve lockout can be used in two different ways as shown below.

Example of how the gate valve lockout is used:

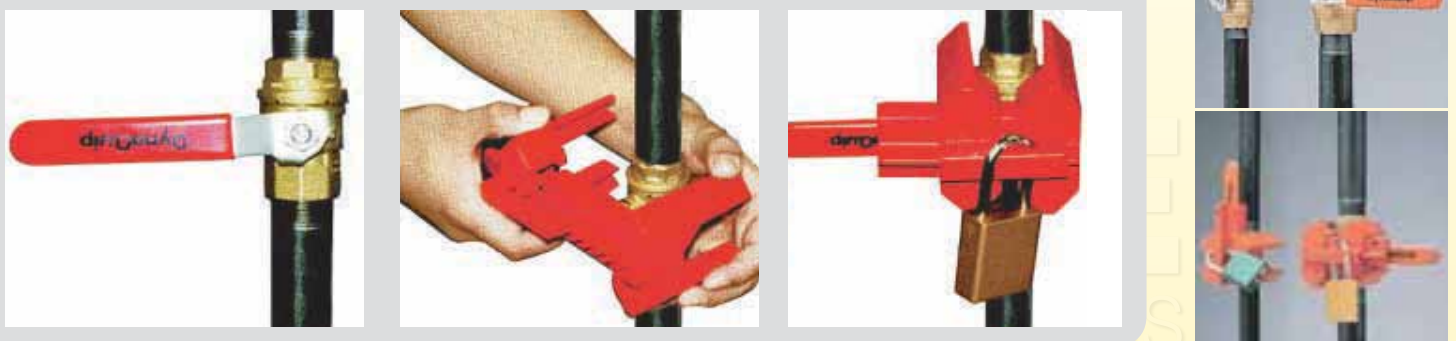

Ball Valve Lockout

Code	Size
VLV700-1	12.5-63.5mm (0.5-2.5")
VLV700-2	50-203mm (2-8")

Example of how the ball valve lockout is used:
